Skills

Programming language

Javascript & Typescript

Frameworks/Platforms

- React, React-Native, NextJS, Angular

- Antd, MUI, Bootstrap, Tailwind

- Redux, Redux-toolkit

- CSS, SCSS

English

Read and write documents

Interests

I like volleyball, music..

Summary

- I'm a Front-end Software Engineer with 1 year of experience in Web Development.
- Experienced Front-end Software Engineer skilled in crafting high-quality web applications, proficient in HTML, CSS, and JavaScript. Capable of building smooth and user-friendly interfaces, leveraging in-depth knowledge of frameworks like React, Angular. Passionate about researching and implementing new technologies to enhance user experiences and maximize application performance. Thrives in creative, adaptable environments, adept at quickly adapting to new requirements

Education

INDUSTRIAL UNIVERSITY OF HO CHI MINH CITY   *2019-2023*

Major: Software Engineering

Work experience

TechSource   *04/2023- 12/2023*

Front-end

Project: HRM (3 members, 2: Front-end, 1: Back-end)

- **Responsibilities:**
  - Collaborated in the development of an HRM website with a team of 3 members, focusing on the front-end aspect while liaising closely with the back-end developer.
  - Took charge of front-end development tasks, leveraging React, MUI, Redux-toolkit, and React-hook-form to ensure an intuitive and efficient user interface.
  - Contributed to the architectural design of the HRM platform, particularly in the implementation of user-friendly features for managing personnel information encompassing personal details, insurance, tax, and contract data.
- **Description:** HRM website assists users in personnel statistics and managing personnel information such as personal details, insurance, taxes, contracts, and more
- **Technologies:** React, MUI, Redux-toolkit, React-hook-form.

ZODINET   *02/2023- 04/2023*

INTERN FULLSTACK

Responsibilities

- Collaborated with the team to design, develop, and implement full-stack applications.
- Built responsive and user-friendly front-end interfaces using frameworks NextJS.
- Developed server-side applications using Node.js and Nestjs, ensuring efficient data transfer and seamless integration with

databases
- Worked with PostgreSQL databases to manage and store data.

Project
- Link Demo: https://cupidiify.vercel.app
- Link Github: https://github.com/Danh-lofi/cupidify
- Funtions:
  + Swipe to find nearby users
  + Map
  + Login, Register with Authencation OTP
  + Chat
  + Profile
- Technology:
  + Front-end side: SASS, Ant design, NextJS, Redux, Socket.
  + Back-end side: NestJS, Swagger, Cloudinary, Firebase, typeORM, Socket.
  + Database: PostgreSQL

App Chat   *24/09/2022- 05/12/2022*

Website App chat

- Link Github: https://github.com/Danh-lofi/App-Chat
- Link Demo: https://suar-chat.web.app/
- Number of members: 5
- Functions:
+ Basic account functions (Login, Register, Forget Password, OTP)
+ Basic messaging functions (send text, image, file)
+ Basic user functions (Add, Unfriend, Find)
+ Basic group functions (Create, Remove, Add/Remove member,)
- Technology:
+ HTML, JS, SASS, ReactJS, Socket, Firebase (Authentication OTP)
+ React Router Dom, Redux, React-Redux
+ ExpressJS, Mongoose, Cloudinary
+ Git
